## **SCOPE OF THE JOURNAL**

Computer Applications: An International Journal (CAIJ) is a Quarterly open access peer- reviewed journal that publishes articles which contribute new results in all areas of the Computer Science Applications. The journal is devoted to the publication of high quality papers on theoretical and practical aspects of computer science applications. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on Computer science application advancements, and establishing new collaborations in these areas. Original research papers, state-of-the-art reviews are invited for publication in all areas of Computer Science Applications.

Authors are solicited to contribute to the journal by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the areas of Computer Science Applications.

### **Topics of interest include but are not limited to, the following**

Accessible Computing Applications  
Algorithms and Computation theory  
Artificial Intelligence and Soft  
Computing Bioinformatics and  
Biosciences  
Computer Architecture  
Computer Graphics and Animation  
Computer Science / Information Technology  
Education Cryptography and Information security  
Data Communication and Computer Networks  
Database Management Systems  
Design Automation  
Digital Signal and Image  
Processing Electronic Commerce  
Embedded Systems  
Genetic and Evolutionary  
Computation Health Informatics
